

SPA THERAPY CERTIFICATE: Part 1 THERAPEUTICS 1

Skin therapeutics is a professional level of skin care reserved to trained professionals. Utilizing natural and alternative methods of care to effect skin health has had a long history of success. Anestheticians conduct skin therapy using various blended modes of care which may also be in tandem with a dermatologist's care plan. Medical spa services are in high demand as the rise in desire of flawless skin continues. Europa Esmod provides this qualification in association with relevant skin care agencies and professionals around the world such as Cibtac, Pearson and BABTAC.

We ensure a quality standard of education and an international standard of professionalism for graduates. All instructors are Certified and Experienced in providing clinical skin care. Students may request International License options upon graduating.
